TASK TITLE

Title – Landing/promotion Page

TASK DESCRIPTION

To develop a Landing page of one choice and Imagination .

- Design reference – according to one's choice/taste of theme and Concept
- Ensuring that the landing page is visually appealing and eye catching and compliments the purpose of landing page

STEPS TAKEN

- Looked for various design and template to get an idea /theme and concept .
- According to the them and concept started building the structure of the landing page.
- And planned the animation the will be given to which components .
- Then after the planning started implementing the HTML part of the body
- After successful completion of the HTML i.e. (all the partitioning and designing)
- Added the JavaScript, CSS to the HTML to bring the design to life and make it more appealing to the users eyes and faced lot of challenge while implementation and resolved them .

CHALLENGES FACED

- In the designing part that which div (ID's and CLASSES) should contain which animation and how to adjust the containers / components .
- While Implementing of the Java-Script animations – what and how to put the animation so that the page looked good and also in adjustment of other div's.

SOLUTION IMPLEMENTED

- Used Gsap to add animations and make site look good
- Use Aoi Ui interaction library to add animation to the webpage !!!

LEARNING'S

- Learned about different UI interaction libraries like Aoi and Gsap
- Learned about java-script and its concepts and methods
